

## When Function Joins Form

**W**hat's the solution for a small space that needs storage, a table, plus a place to sit and lounge with room for only one? Ben Kelley's creation.

Think of his answer as a kind of table, love seat, sea captain's chest, and lounge chair wrapped in a Rubic's Cube. Ben's design combines Japanese elegance and Scandinavian utility joined with precise craftsmanship, all rendering his work museum worthy. The finishing touch is a custom cushion by Destiny Interiors.

"The piece truly did have its origin from need," says Ben, "I lived in small spaces and sometime did have to make the choice between very fundamental items of furniture."

Crafted from top grade cherry wood, Ben's box becomes the understated full cast for the whole room regardless of size.

Ben can be reached at [benjamin.kelley@verizon.net](mailto:benjamin.kelley@verizon.net).

**Fit for many rooms, fabulous for many functions: Ben Kelley's creation is part bed, part box, part table, part couch, and all ingenious, topped off with elegance and born from the experience of living in small spaces.**
